GMT curves defined by parametric equations pdf -

A Bézier curve (pronounced in French) is a parametric curve used in computer graphics and related fields. The curve, which is related to the Bernstein polynomial, is named after Pierre Bézier, who used it in the 1960s for designing curves for the bodywork of Renault cars. Other uses include the design of computer fonts and animation. Bézier ...

Bézier curve - Wikipedia

- A classification model (classifier or diagnosis) is a mapping of instances between certain classes/groups. The classifier or diagnosis result

can be a real value (continuous output), in which case the classifier boundary between classes must be determined by a threshold value (for instance, to determine whether a person has hypertension based ...
